

EASY WAY TO LEARN KP

BIRTH TIME RECTIFICATION

Author : Kanakkumar B. Bosmia

Foreword

When we cast a KP chart the correct birth time is necessary for accurate prediction, as the position of the sub lords cusps can vary even within in a few minutes difference. However there is no birth time rectification method that can always give the correct birth time, because the rectified birth time can vary depending on time, place and method of rectification. Even in using the same method, the rectified birth time can vary from one astrologer to another, because of the different ruling planets at the time of calculation.

Under these circumstances, if only the birth time is doubtful, especially by the consultant himself or herself, the birth time rectification is being done by the help of ruling planets at the moment when you have the urge to solve the query, then mysteriously God will help you to select the astrologically correct birth time. (KP Reader III, p 281) After correcting birth time, verification is needed to confirm that the native's life events agree with the rectified birth time.

In this “Easy way to learn KP - Birth Time Rectification” book, Shri Kanak Bosmia has demonstrated his well tested RP-based birth time rectification methods with practical calculation of forty five examples for different variations of doubtful birth time, date and even year as shown in the table of contents. The basic guide line in his methods is that Moon's position in RP will show the birth Ascendant position, and RP Ascendant will show the Moon's position at the time of birth. All examples come with full birth particulars and RP details, so that readers can cast the chart themselves and practice what he has done. Verification of different life events in each example will also help readers to learn practical application of KP rules and house grouping.

This is a very useful reference book for KP followers for birth time rectification!

Foreword

"Very Clear, Concise and To-The-Point book on birth time rectification." Shri Bosmia Ji's book is an effective tool on birth time rectification. As I finished reading "Easy way to learn KP birth Time rectification", I realized it's the most lucid and cogent understanding about applied Krishnamurthy Paddhati. I recommend this book to anyone wanting to check existing birth time or for birth time rectification. This book not only gives you complete understanding of birth time rectification but also is a remarkable work of a most remarkable KP astrologer of our times.

Birth time rectification is one of the most complicated practices within Astrology, and in the last 25 years of my Astrology studies, I have found birth time correction to be a big dilemma for most revered astrologers since ages. Starting from early literature on this topic from 'Nashat Jatakam' to even the most evolved form of birth time correction through ruling planets and matching event dates of client, a gap still remained for accuracy about the same. No one could lay a finger on the confusion wrapped around it. Shri Kanak Kumar Bosmia has completely eradicated any conflict in this calculation and has explained that through his uncanny ability to explain a complicated concept in a simple manner. I believe this can happen only when an astrologer has achieved a yogic siddhi along with disciplined and meditative practice of astrology for decades. Shri Bosmia Ji started studying astrology in mid 70s and started a professional practice in mid 90s.

I've been following him over the years by reading all of his remarkable books on Horary Astrology and selection of best time to start important work for getting growth and success. It is an honour for MahaVastu Family when he taught basic KP astrology at MahaVastu Centre, Noida. Every participant was thrilled with his teaching techniques.

I congratulate Shri Bosmia Ji for such a great contribution in the world of astrology, which will enlighten Astro Power Enthusiasts forever.

Foreword

Birth Time Rectification is a challenging task for any astrologer. More often than not, clients give approximate time of birth when approaching an astrologer for horoscope analysis. A competent astrologer will apply one or more birth time rectification techniques before proceeding with casting of horoscope.

In this book, Shri. Kanak Bosmia has systematically described the procedure for arriving at correct birth time when time of birth, or date of birth or even year of birth is unknown. KP enthusiasts are well aware of the works of Shri. Kanak Bosmia, and how much experience he has in this field. This new book will be of great value to both beginners and experts in the field and is a great addition to the existing literature on KP system.

My Best wishes to the Shri. Kanak Bosmia.

Acknowledgment

This is my second book and I hope it will get the same enthusiastic response that my earlier book “KP Muhurat—A Novel Technique in KP” (now out of print) received.

In this book, I have tried to give numerous examples to illustrate the birth time rectification technique used in KP. I am sure readers will not be disappointed.

All examples come with full birth particulars and RP details, so that readers can cast the chart themselves and check what I am doing. This is in sharp contrast to what some authors practice these days: deliberately omit birth particulars in order to hide mistakes or to project his/her own pet theories.

My well wishers, friends and patrons know that even though I am not highly qualified in terms of formal education, I have decades of experience in astrology, both traditional and KP. The tremendous response that I receive for the KP Ezine published every month only shows that true KP followers believe in my work.

I am grateful to my students Shri. Sangamji and Shri. Hemantbhai Gajjar for proof reading. I want to thank Shri. Tin Win and Shri. Rangarajan Krishnamoorthy for reviewing all the chapters patiently and diligently.

Lastly, without the blessing of my parents I would not have been able to complete this book. I will remain grateful to them always.

The success or failure of any book is measured only by readers’ feedback. therefore request you all to send your suggestions and feedback so that I can incorporate them in future editions of this book, or in other books that I intend to publish.

Important Note for Readers

- 1: All the charts in this book were prepared using KPAstro 4.1™
- 2: have worked out Sayana based Ascendant calculations from “The Michelson Book of Tables” and deducted Ayanamsha for the corresponding year. But if you use Raphael’s “Table of Houses”, you may find some differences in calculations for the same Ascendant.
- 3: have worked out Sayana based Moon position by using “American ephemeris” and deducted Ayanamsha for the corresponding year. But if you use a different ephemeris, you may find some differences in calculations for the same Moon.
- 4: In this book I have calculated for Latitude 23 N 00 for Ruling Planets in most of the cases by using KPAstro 4.1™
- 5: Some astrologers use ‘Universal Table of Houses’, some use Raphael’s ‘Tables of Houses’, some use “The Michelson Book of Tables” and some others use simplified tables of houses. We have noticed differences among all the above mentioned tables. So readers have to be careful about the relevant cusp, if a change is found in the relevant cusp sub lord, after changing +/- one min difference. Because if the sub lord is changed, then results might also change. Same thing may happen with planets. Many publications are available for Ephemeris. We have found differences among various ephemeris, especially in Moon’s Deg, Min. In dasa calculation, one min of difference in Moon’s position can change the dasa days by 3 to 9. So please be careful in calculating Moon’s longitude.
- 6: Even if two persons use the same Tables of Houses and the same Ephemeris, sometimes a difference of about 2 minutes is likely. In calculations, some use logarithms, some use Shri R.E. Manu’s ‘Astrological tables for all’. Thus for the same Ascendant time and same place, we have noticed difference in calculations of both Ascendant and Antra dasa, leading to slightly differing interpretation and judgment. Readers should take this aspect into consideration.
- 7: It is important to keep in mind the rectified time can vary from one astrologer to another because of the RP at the time of calculation. This means that no single rectification method or theory can guarantee 100% correct time.
- 8: Finally, I want to stress that making mistakes is common and human! However, we should try to work out the calculations as carefully as possible.

Part-I Theory

Chapter: 1

Hints for rectifying birth time

When the astrologer starts work on Birth Time Rectification, the ruling planets at that time should be cast for Ascendant and Moon position. Moon's position in RP will show the birth Ascendant position and RP Ascendant will show Moon's position at the time of birth.

1) When the birth time is reasonably clear, may be with difference of 1 or 2 minutes, we have to follow the following procedure:

RP Moon's Sign lord, Star lord, Sub-lord, Sub-sub lord (anyone from this four), must match with the birth Ascendant's Sub-lord, Sub-sub lord.

During 2 minute Ascendant's sign lord or star lord not change , thus we don't bother even they are not appear in RP Moon.

2) When we suspect that birth time of the native may be off by more than 15 to 20 minutes:

RP Moon's Sign lord, Star lord, Sub-lord, Sub-sub lord (anyone from this four), must match with the birth Ascendant's Star lord, Sub-lord.

3) When we suspect that birth time of the native may be off by 1 or 2 hours:

First, take RP Ascendant. Note the difference in time required for birth Moon to tally with RP Ascendant. We may find 2 or 3 Moon positions as possibilities. To find out within these 2 or 3 positions of Moon we have to check which birth Ascendant position will tally with RP Moon. To make the birth Ascendant Sub lord or Sub Sub Lord agree with RP Moon, we should move the birth time forward or backward by a few minutes, with the Moon remaining at the same position.

4) When we consider Rahu or Ketu as an agent of another planet, first check the node's Sub-lord. If the Sub-lord of node is in RP then only consider it, otherwise do not. However this rule applies only for considering time of birth and not for considering day/month/year of birth. Remember this rule apply only if we add Rahu or Ketu as a agent, not if Rahu or Ketu come directly in RP.

5) We do not consider retrograde effect in RP. Even any planet in RP is retrograde motion or in the star of retrograde planet or retrograde sub lord, we will consider in RP.

Chapter: 2

Ruling Planets.

Ruling Planets (RP):

For birth time rectification, we need 9 RPs as given below.

- 1) Day lord
- 2) Moon sign lord
- 3) Moon star lord
- 4) Moon sub lord
- 5) Moon sub sub lord
- 6) Ascendant sign lord
- 7) Ascendant star lord
- 8) Ascendant sub lord, and
- 9) Ascendant sub sub lord.

For correcting the birth Moon, we need to tally with RP Ascendant and for correcting birth Ascendant need to tally with RP Moon.

Role of Node:

If a node appears directly as an RP, take it. But in order to consider a node as an agent for another planet, the node's sub lord must appear as an RP. If the node's sub lord is not in RP, then do not consider the node as an agent at all. This rule apply only for considering birth time not for considering birth year-birth month-birth day. This is shown in the following example.

Ruling planet:

At the time of rectification ruling planet are as under.

RP Date: 25-04-2013; Thursday; **RP Time:** 15:51:09 PM IST

RP Place: Kankariya- Ahmedabad **Lon/Lat:** 23° N 00', 72° E 36',

Aynamsha: 23°.57'.10"

	DL	SgL	StL	SbL	SSL
Day: Thursday	Jup				
Ascendant: Leo 28°.12'.54"		Sun	Sun	Moo	Ven
Moon: Libra 06°.00'.24"		Ven	Mar	Moo	Jup

Rahu is conjoined with Moon. Ketu is conjoined with Sun and Mars. Rahu and Ketu are in the sub of Saturn and Saturn is not in RP. Thus we do not include Rahu or Ketu as RP.

Role of Punarphoo:

If in RP we find Punarphoo yoga, then we select star or sub or sub sub, whichever comes last. We will discuss this with practical examples later on in the book.

Note: DL = Day Lord, SgL = Sign Lord, Stl = Star Lord, SbL = Sub lord, SSL = Sub Sub Lord, SSSL = Sub Sub Sub Lord

Chapter: 3

Step how to do Birth time rectification.

1. Year selection

In RP we get 4 planets as RP of Ascendant, i.e. sign, star, sub, and sub-sub lords. Additionally, the nodes may also come into picture as agents. For confirming the year of birth, we have to examine Jupiter's position on the birthday and at the given birth time. For each possible year (considering the date and time given), we usually get one star and one sub and we have to select from one of these. If Punarphoo dosha seen in RP, then we will select the last one or Saturn using commonsense. The following chapters give practical application of this rule.

2. Month selection

In RP we get 4 planets as RP of Ascendant, i.e. sign, star, sub, and sub-sub lords. Additionally, the nodes may also come into picture as agents. For confirming month, we have to check Sun's position on the birthday and at the given birth time. For each possible month (considering the date and time given), we usually get one star and one sub and we have to select from one of these. If Punarphoo dosha seen in RP, then we will select the last one or Saturn using commonsense. The following chapters give practical application of this rule.

3. Day selection

In RP we get 4 planets as RP of Ascendant, i.e. sign, star, sub, and sub-sub lords. Additionally, the nodes may also come into picture as agents. For confirming the day, we have to check Moon's position on the birthday and at the given birth time. For each possible day (considering time given), we usually get 1 or 2 star and we have to select from one of these. If Punarphoo dosha seen in RP, then we will select the last one or Saturn using commonsense. The following chapters give practical application of this rule.

4. Sign and Star selection of Ascendant

In RP we get 4 planets as RP of Moon, i.e. sign, star, sub, and sub-sub lords. Additionally, the nodes may also come into picture as agents. Generally we get 2 or 3 stars for the time duration given by client and we have to select one of those. If Punarphoo dosha seen in RP, then we will select the last one or Saturn using commonsense. When we fix star we can get sign lord. If we have two sign during one star we consider one which is in RP Moon. The following chapters give practical application of this rule.

5. Sub selection

In RP we get 4 planets as RP of Moon, i.e. sign, star, sub, and sub-sub lords. Additionally, the nodes may also come into picture as agents. Generally we get 3 to 9 subs for the time duration given by client, and we have to select one of those. If Punarphoo dosha seen in RP, then we will select the last one

or Saturn using commonsense. The following chapters give practical application of this rule.

6. Sub sub selection

In RP we get 4 planets as RP of Moon, i.e. sign, star, sub, and sub-sub lords. Additionally, the nodes may also come into picture as agents. Generally we get all nine sub subs for the time duration given by client, and we have to select one of those. If punarphoo dosha seen in RP, then we will select the last one or Saturn using commonsense. The following chapters give practical application of this rule.

7. Event checking

After correcting birth time, we have to confirm that the native's life events agree with the rectified birth time. Mainly events related to sub lord must signify the relevant bhava. For example, if we examine Marriage, as per the rectified chart, 7th sub lord must signify 2 or 7 or 11.

Rahu is aspected by Saturn, thus represent Saturn. Ketu Conjoined with Mars, thus represent Mars. Rahu and Ketu are in the sub of Saturn and Saturn is in RP.

Punarthoo yoga: Moon is in the sign and sub of Saturn, Hence Punarthoo yoga.

Note: The time of birth as given in the hospital records is 7 AM. Also, as my birth was a very difficult one and everyone was under doubt whether I would survive, the doctors and nurses should have been under a lot of tension. So the rounded off 7 AM time is also most likely only approximate. This is because the Ascendant changes at 7.06 AM. I hope you could find my accurate birth time and hence the correct Ascendant and horoscope.

Place of Birth: Derapur-UP **Lon/Lat:** 26° N 25', 79° E 48',

Note: My brother was the one who told me about my birth time. But, I just found out from my brothers that my both my birth time and date are approximate only. There are no proper records through which they can be accurately stated it seems.

I have told you that my date of birth is December 7, 1986 at 2 AM. But I do not have any records to verify it. My mother is the only source of information regarding my birth time and she herself is not clear about it.

My mother had told my brother that I was born on December 6th night at 2 AM. My brother therefore assumed that she meant I was born at 2 AM on the night following the day, December 6. As the time she mentions is 2 AM, it is past midnight and so my brother assumed that the date would be December 7. This is logical. However, my mom might have actually meant that the date of birth was December 6 and the time of birth was 2 AM. As the time is past midnight, the calendar date would have already been December 6. This would result in a birth time of December 6, 2 AM. Therefore, there is a confusion even about the date of birth. My mother does not remember correctly now and so we cannot find out for sure.

I kindly request you to consider these factors before performing the rectification. To summarize, I would say that both the date and time of birth I have given you could be inaccurate.

Therefore, you would have to check between the following dates:

1. Around 2 AM, December 7, 1986 ; 2. Around 2 AM, December 6, 1986

Please note that the 2 AM time of birth is also approximate. It could be 2 30 AM or 1 30 AM or anytime beyond them as well. Even the margin of error cannot be very correctly estimated. So, I kindly request you to rectify both the dates and the time.

(1) She prepared my horoscope when I was studying in 8th Standard, with the date 10.03.1968. I am not sure that she remembered correct date and time while giving the details to astrologer.

(2) It was only after her death, I felt suspicious about it. Because, I found her wedding invitation card lying with one of my uncles where the marriage date was mentioned as 8th September 1967. The difference between 10.03.1968 and 08.09.1967 is only 6 months so it must be definitely wrong.

(3) Till her death, she used to tell me that for one year after marriage she suffered from some uterus related problems due to which she was unable to conceive. She once got an abortion too, details of which I don't remember exactly.

(4) Because of all the above cited reasons, I assume that my birth date may be actually 10.03.1969 but for school purposes she made it 10.03.1968 - prepended one year. Only she knew my real birth date or birth month or birth time. I enquired with all my relatives who are alive now. But none of my relatives were able to recollect which year, month, date and time I was born.

Part A (For 23 N 00)

In line 8th Latitude is 23 and in first box under Ascendant we can see 23⁰.43'. In second box line 8th Latitude is 23 and in second box under Ascendant we can see 24⁰.59'. We have need 23⁰.57'.10" this value comes under above two boxes. Deferent between both is 24⁰.59' - 23⁰.43' = 01⁰.16'

For first box RAMC is 19H.12M.00S and in second box 19H.16M.00S, thus different between both RAMC is 4 M.

We need 23⁰.57'.10". so we have to deduct 23⁰.43' from 23⁰.57'.10"

23⁰.57'.10" - 23⁰.43' = 14'.10"

01⁰.16' deferent and duration is 4 M

So 14'.10" = ?

$$\frac{4 \text{ M} \times 14'.10''}{01^0.16'} = 45\text{S}$$

Now we add this value in first box RAMC 19H.12M.00S + 00M. 44S
19H.12M.44S.

This is the starting RAMC for Aries 00⁰.00'.00" Nirayan Ascendant position for 23 N 00.

Part B (For 24 N 00)

On page 113, in line 9th Latitude is 24 and in last box under Ascendant we can see 22⁰.40'. On page 114, in first box line 9th Latitude is 24, Ascendant we can see 23⁰.58'. We have need 23⁰.57'.10" this value comes under above two boxes. Deferent between both is 23⁰.58' - 22⁰.40' = 01⁰.18'

On page 113, For last box RAMC is 19H.08M.00S and On page 114, in first box RAMC is 19H.12M.00S, thus different between both RAMC is 4 M.

We need 23⁰.57'.10". so we have to deduct 22⁰.40' from 23⁰.57'.10"
 23⁰.57'.10" - 22⁰.40' = 1⁰.17'.10"

01⁰.18' deferent and duration is 4 M
 So 1⁰.17'.10" = ?

$$\frac{4 \text{ M } \times 1^0.17'.10''}{01^0.18'} = 3\text{M}.57\text{S}$$

Now we add this value in first box RAMC
 19H.08M.00S + 3M. 57S = 19H.11M.57S.

This is the starting RAMC for Aries 00⁰.00'.00" Nirayan Ascendnat position for 24 N 00.

01⁰ deferent and duration is 48S
 So 02' = ?

$$\frac{48\text{S } \times 02'}{01^0} = 02\text{S}$$

When we check result of 23 N 00 to 24 N 00 value is less, hence we deduct

getting result 1M.34S from 23 N 00 (RAMC Part A)
 19H.12M.45S - 02S = 19H.12M.43S

New we try to get time:

05.44.49 Aries Ascendant starting time.

Now we try to get Taurus Ascendant starting time.

Part A (For 23 N 00)

All table of house are in Sayana position. So when we check for any Nirayn position we have to deduct Aynamsha values, in this case now we try to get Taurus Ascendant. $00^{\circ}00'00'' + 23^{\circ}57'10'' = 23^{\circ}57'10''$ Sayana Ascendant. In line 8th Latitude is 23 and in first box under Ascendant we can see $23^{\circ}38'$. In second box line 8th Latitude is 23 and in second box under Ascendant we can see $24^{\circ}45'$. We have need $23^{\circ}57'10''$ this value comes under above two

For first box RAMC is 20H.52M.00S and in second box 20H.56M.00S, thus different between both RAMC is 4 M.

We need $23^{\circ}57'10''$, so we have to deduct $23^{\circ}38'$ from $23^{\circ}57'10''$
 $23^{\circ}57'10'' - 23^{\circ}38' = 19'10''$

$01^{\circ}07'$ deferent and duration is 4 M

So 19'.10" = ?

$$\frac{4 \text{ M } \times 19'.10''}{01^0.07'} = 1\text{M. } 09\text{S}$$

01.39.17 duration of Aries Ascendant.

How to find out duration of star

We have duration of Aries ascendant 01.39.17.

In Aries star as bellow:

Aries 00° 00'.00" to 13° 20'.00" – Ketu star

Aries 13° 20'.00" to 26° 40'.00" – Venus star

Aries 26° 40'.00" to 30° 00'.00" – Sun star

From above information, we will try to get duration of each star.

30° duration 01.39.17.

So, 13° 20' = ?

$$\frac{01.39.17 \times 13^{\circ} 20'}{30^{\circ}} = 44M. 07S$$

Starting time of Aries is 05.44.49 + 44M. 07S duration of Ketu star = 06.28.56

Starting time of Ketu star is 06.28.56 + 44M.07S duration of Venus star = 07.13.03

For Sun star:

30° duration 01.39.17.

So, 3° 20' = ?

$$\frac{01.39.17 \times 3^{\circ} 20'}{30^{\circ}} = 11M. 02S$$

Starting time of Ketu star is 07.13.03 + 11M.02S duration of Venus star = 07.24.05

Thus, we have star duration as under:

Aries 00° 00'.00" to 13° 20'.00" – Ketu star – Duration 05.44.49 to 06.28.56

Aries 13° 20'.00" to 26° 40'.00" – Venus star –Duration 06.28.56 to 07.13.03

Aries 26° 40'.00" to 30° 00'.00" – Sun star – Duration 07.13.03 to 07.24.05

How to find out duration of sub

We have duration of Aries ascendant 01.39.17.

In Aries Ketu star , sub are as bellow:

Sub duration:

Sub	Duration		
Ketu	00°	46'	40"
Venus	02°	13'	20"
Sun	00°	40'	00"
Moon	01°	06'	40"
Mars	00°	46'	40"
Rahu	02°	00'	00"
Jupiter	01°	46'	40"
Saturn	02°	06'	40"
Mercury	01°	53'	20"

From above information, we will try to get duration of each sub in Ketu star.

Ketu sub

13° 20' duration 44M. 07S.

So, 46'.40"= ?

$$\frac{44M.07S \times 46'.40''}{13^{\circ}20'} = 2M. 34S$$

Starting time of Aries sign, Ketu star, Venus sub is 05.44.49 + 2M.34S
duration of Ketu sub = 05.47.23.

Venus sub

13° 20' duration 44M. 07S.

So, 2° 13'.20"= ?

$$\frac{44M.07S \times 2^{\circ}13'.20''}{13^{\circ}20'} = 7M. 21S$$

Starting time of Aries sign, Ketu star, Venus sub is 05.47.23 + 7M.21S
duration of Venus sub = 05.54.44.

Sun sub

13° 20' duration 44M. 07S.

So, 40' = ?

$$\frac{44M.07S \times 40'}{13^{\circ}20'} = 2M. 12S$$

Starting time of Aries sign, Ketu star, Sun sub is 05.54.44+ 2M.12S duration of
Sun sub = 05.56.56.

Moon sub

13° 20' duration 44M.07S.

So, $1^{\circ}06'.40'' = ?$

$$\frac{44M.07S \times 1^{\circ}06'.40''}{13^{\circ}.20'} = 3M.40S$$

Starting time of Aries sign, Ketu star, Moon sub is $05.56.56 + 3M.40S$ duration of Moon sub = $06.00.36$.

Mars sub

$13^{\circ}.20'$ duration $44M.07S$.

So, $46'.40'' = ?$

$$\frac{44M.07S \times 46'.40''}{13^{\circ}.20'} = 2M.34S$$

Starting time of Aries sign, Ketu star, Mars sub is $06.00.36 + 2M.34S$ duration of Mars sub = $06.03.10$.

Rahu sub

$13^{\circ}.20'$ duration $44M.07S$.

So, $2^{\circ} = ?$

$$\frac{44M.07S \times 2^{\circ}}{13^{\circ}.20'} = 6M.37S$$

Starting time of Aries sign, Ketu star, Rahu sub is $06.03.10 + 6M.37S$ duration of Rahu sub = $06.09.47$.

Jupiter sub

$13^{\circ}.20'$ duration $44M.07S$.

So, $1^{\circ}46'.40'' = ?$

$$\frac{44M.07S \times 1^{\circ}46'.40''}{13^{\circ}.20'} = 5M.52S$$

Starting time of Aries sign, Ketu star, Jupiter sub is $06.09.47 + 5M.52S$ duration of Jupiter sub = $06.15.39$.

Saturn sub

$13^{\circ}.20'$ duration $44M.07S$.

So, $2^{\circ}06'.40'' = ?$

$$\frac{44M.07S \times 2^{\circ}06'.40''}{13^{\circ}.20'} = 6M.59S$$

Starting time of Aries sign, Ketu star, Saturn sub is $06.15.39 + 6M.59S$ duration of Saturn sub = $06.22.38$.

Mercury sub

$13^{\circ}.20'$ duration $44M.07S$.

So, $1^{\circ}53'.20'' = ?$

$$\frac{44M. 07S \times 1^{\circ}53'.20''}{13^{\circ}.20'} = 6M. 14S$$

Starting time of Aries sign, Ketu star, Mercury sub is 06.22.38 + 6M. 14S
duration of Mercury sub = 06.28.52.

Thus, we have in Ketu star duration as subs are as under:

Star Lord	Sub Lord	End time
Ket	Ket	05.47.23
Ket	Ven	05.54.44
Ket	Sun	05.56.56
Ket	Moo	06.00.36
Ket	Mar	06.03.10
Ket	Rah	06.09.47
Ket	Jup	06.15.39
Ket	Sat	06.22.38
Ket	Mer	06.28.52

Same way we can calculate sub sub too.

If you calculate with help of software, you may find difference of 30 seconds to 1 minute in manual calculation.

On 23-April 2013 Moon is as at 5.30 PM :

Libra 02⁰.37'.15" - 23⁰.57'.10" = Virgo 08⁰.40'.05"

On 24-April 2013 Moon is as at 5.30 AM

Libra 09⁰.34'.07" - 23⁰.57'.10" = Virgo 15⁰.36'.57"

On 24-April 2013 Moon is as at 5.30 PM

Libra 16⁰.36'.34" - 23⁰.57'.10" = Virgo 22⁰.39'.24"

On 25-April 2013 Moon is as at 5.30 AM :

Libra 23⁰.44'.12" - 23⁰.57'.10" = Virgo 29⁰.47'.02"

In Virgo we have star as under:

Virgo 00⁰.00' to 10⁰.00' Sun star
 Virgo 10⁰.00' to 23⁰.20' Moon star
 Virgo 23⁰.20' to 30⁰.00' Mars star

We have on 24th April 5.30 AM Moon is Virgo 15⁰.36'.57", we can know that Moon is in Moon star from Virgo 10⁰.00' to 23⁰.20'.

To check starting and ending time of Moon star we follow bellow procedure;

On 24th Moon star is already started, so it is clear that Moon star start before 24th, so we try to check 23rd April 2013.

Moon star start at $10^{\circ}00'00'' - 08^{\circ}40'05'' = 01^{\circ}19'55''$
 We have to go ahead for starting point of Moon star for $01^{\circ}19'55''$ from
 23-April 2013 at 5.30 PM.

Moon at 5.30 AM on 24-4-2013 Virgo $15^{\circ}36'57''$
 Moon at 5.30 PM on 23-4-2013 Virgo $08^{\circ}40'05''$
 $06^{\circ}56'52''$ proportionate movement

$06^{\circ}56'52''$ proportionate movement in 12 hr.
 So, $01^{\circ}19'55'' = ?$

$12 \times 01^{\circ}19'55''$ = 2H. 18M. 02S proportionate movement
 $06^{\circ}56'52''$

on 23-4-2013 Moon at 5.30 PM + 2H. 18M. 02S = 19.48.02 is starting time of
 Moon star.
 Now we try to find out end time of Moon star.

Moon at 5.30 AM on 25-4-2013 Virgo $29^{\circ}47'02''$
 Moon at 5.30 PM on 24-4-2013 Virgo $22^{\circ}39'24''$
 $07^{\circ}07'38''$ proportionate movement

Moon star start at $23^{\circ}20'00'' - 22^{\circ}39'24'' = 00^{\circ}40'36''$

We have to go ahead for ending point of Moon star for $00^{\circ}40'36''$ from
 24-April 2013 at 5.30 PM.

$07^{\circ}07'38''$ proportionate movement In 12 hr.
 So, $00^{\circ}40'36'' = ?$

$12 \times 00^{\circ}40'36''$ = 1H. 08M. 22S proportionate movement
 $07^{\circ}07'38''$

on 24-4-2013 Moon at 5.30 PM + 1H. 08M. 22S = 18.38.22 is ending time of
 Moon star.

18.38.22 Moon star end on 24-4-2013
19.48.02 Moon star start on 23-4-2013
 22.50.20 is duration of Moon star.

Sub duration:	Sub	Duration		
	Moon	01°	$06'$	$40''$
	Mars	00°	$46'$	$40''$
	Rahu	02°	$00'$	$00''$
	Jupiter	01°	$46'$	$40''$
	Saturn	02°	$06'$	$40''$
	Mercury	01°	$53'$	$20''$
	Ketu	00°	$46'$	$40''$
	Venus	02°	$13'$	$20''$

Sun 00° 40' 00"

Moon's proportionate movement is not fix, so we have to check all proportionate movement for each 12 hrs. as given bellow from ephemeris.

On 23-April 2013 Moon is as at 5.30 PM

Libra 02⁰.37'.15" - 23⁰.57'.10" = Virgo 08⁰.40'.05"

On 24-April 2013 Moon is as at 5.30 AM :

Libra 09⁰.34'.07" - 23⁰.57'.10" = Virgo 15⁰.36'.57"

On 24-April 2013 Moon is as at 5.30 PM

Libra 16⁰.36'.34" - 23⁰.57'.10" = Virgo 22⁰.39'.24"

On 25-April 2013 Moon is as at 5.30 AM

Libra 23⁰.44'.12" - 23⁰.57'.10" = Virgo 29⁰.47'.02"

Moon star start on 23rd at 19.48.02.

24 April 2013 05.30 AM: Virgo 15⁰.36'.57"

23 April 2013 05.30 PM: Virgo 08⁰.40'.05"

06⁰.56'.52" proportionate movement

Moon sub

06⁰.56'.52" movement 12 hrs

So, 01⁰.06'.40" = ?

$\frac{12 \times 01^0.06'.40''}{06^0.56'.52''} = 1\text{H. } 55\text{M. } 08\text{S}$

Moon star Jupiter sub start on 24-4-2013 at 02.31.01 + 3H. 04M. 13S
05.35.14 end time.

Now from here Moon's proportionate movement will change, thus again we need to check as bellow:

24 April 2013 05.30 PM: Virgo 22⁰.39'.24"

24 April 2013 05.30 AM: Virgo 15⁰.36'.57"

09.11.10 end time.

Mercury sub

07⁰.02'.27" movement 12 hrs

So, 01⁰.53'.20" = ?

$$\frac{12 \times 01^0.53'.20''}{07^0.02'.27''} = 3\text{H. } 13\text{M. } 10\text{S}$$

Moon star Mercury sub start on 24-4-2013 at 09.11.07. + 3H. 13M. 09S

So, 00⁰.46'.40" = ?

$$\frac{12 \times 00^0.46'.40''}{07^0.02'.27''} = 1\text{H. } 19\text{M. } 32\text{S}$$

Moon star Ketu sub start on 24-4-2013 at 12.24.20 + 1H. 19M. 32S
13.43.52 end time.

Venus sub

07⁰.02'.27" movement 12 hrs

So, 02^o.13'.20" = ?

$$\frac{12 \times 02^{\circ}.13'.20''}{07^{\circ}.02'.27''} = 3\text{H. } 47\text{M. } 15\text{S}$$

Moon star Venus sub start on 24-4-2013 at 13.43.52 + 3H. 47M. 15S
17.31.07 end time.

Now from here Moon's proportionate movement will change, thus again we need to check as bellow:

25 April 2013 05.30 AM: Virgo 29^o.47'.02"
24 April 2013 05.30 PM: Virgo 22^o.39'.24"
07^o.07'.38" proportionate movement

Sun sub

So, 00^o.40'.00" = ?

$$\frac{12 \times 00^{\circ}.40'.00''}{07^{\circ}.07'.38''} = 1\text{H. } 07\text{M. } 21\text{S}$$

Moon star Sun sub start on 24-4-2013 at 17.31.02 + 1H. 07M. 20S = 18.38.28
